

One Hardware. Infinite Intent.

Achieves computing fluidity through custom apps.

We didn't build three systems. We built one that fits.

One Hardware. Many Functions.

- Switch the App, not the device
- Same hardware. Different roles
- Built to adapt, not get replaced

“Capabilities are defined by the embedded app you deploy.”

“Multiple Stakeholders, one hardware. Change the App, change the outcome.”

One Device. Multiple Roles.

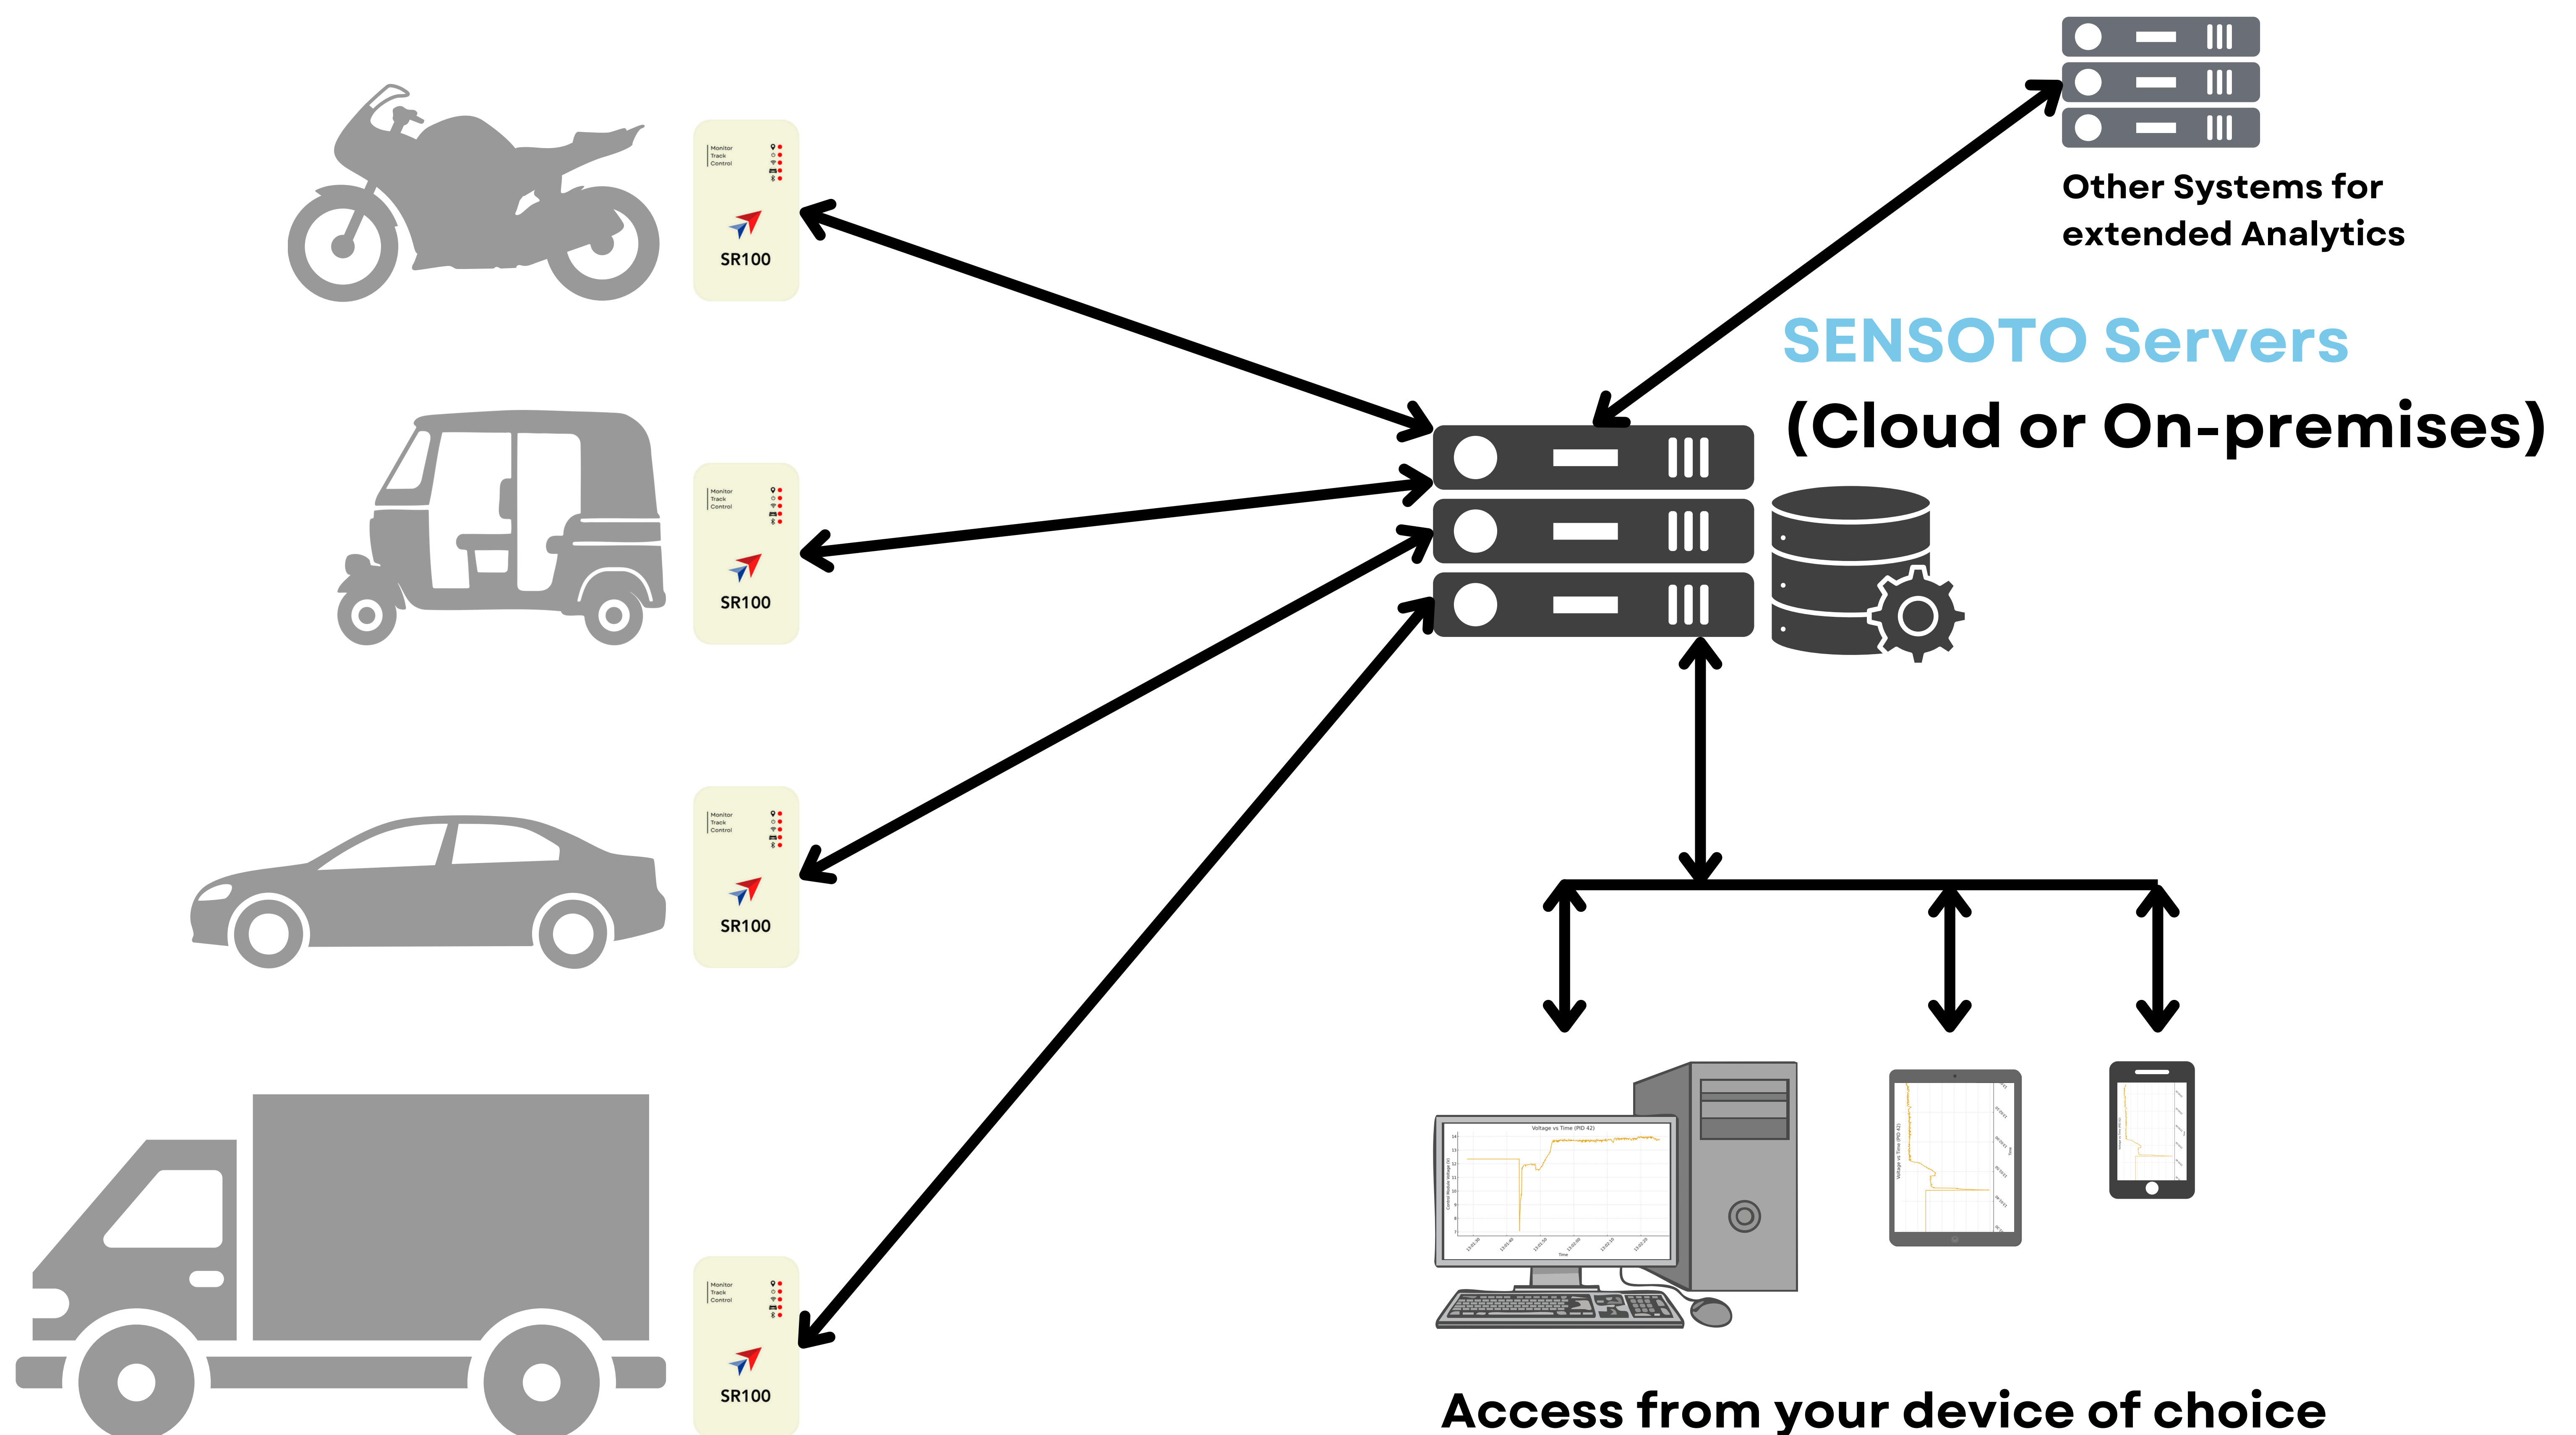

- Custom apps for your exact purpose
- Collect only the data that matters
- Analyse with intent, not overload

Not a rigid product.

An ecosystem built for change.

An Ecosystem. You are in control.

Plug it in. CAN connection, seamless and instant

Listen in. Your vehicle's data, decoded

Stay aware. Trouble codes caught before they trouble you

Take control. Embedded Apps & Custom config fast & simple

Analyse smart. Wireless sync with **SENSOTO** server

Make it yours. Upgrade, customise and evolve via App-Hub

Designed for interoperability and scalability

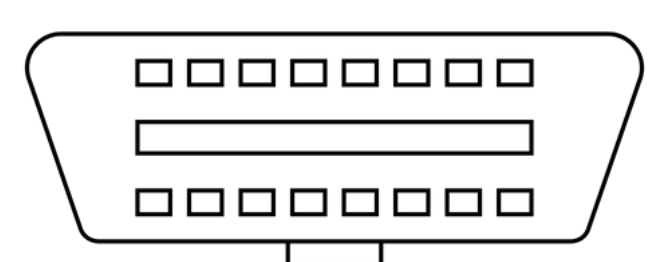

One Hardware. Many Roles.

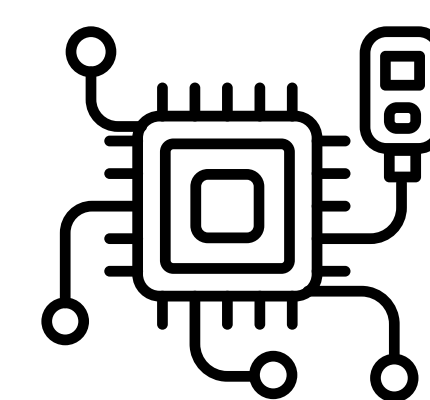

SR100 - Device Specifications

- Designed to work directly with CAN bus
- No external power source required
- Supports custom embedded applications
- Easy local setup and app configuration
- Connects securely to the **SENSOTO** platform
- 16 GB SD card for reliable local storage
- Location and movement awareness built-in

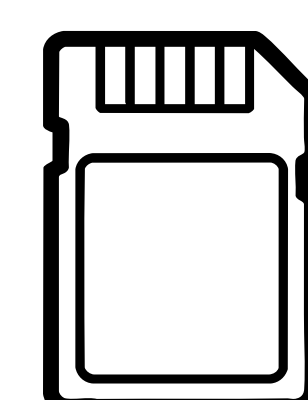

- CAN* 1 Ch interface
- Powered via OBD (12 to 36V)

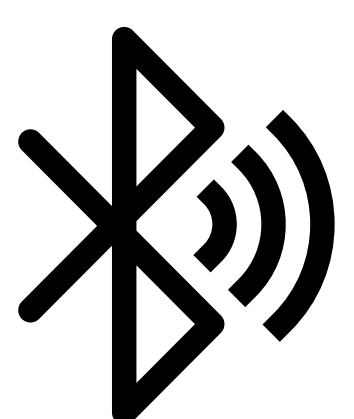

- Embed Apps from **AppHub**
- Configure device remotely

- Connect to Mobile hotspot
- Upload data & Download Embed Apps

- Data Storage in standard files
- Diagnostics data storage

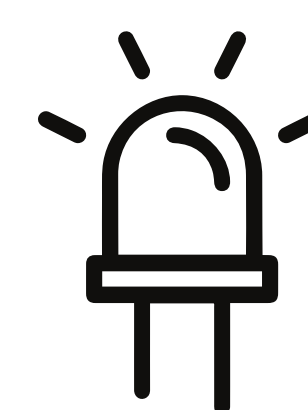

- Configure using Bluetooth
- External Display (Optional)

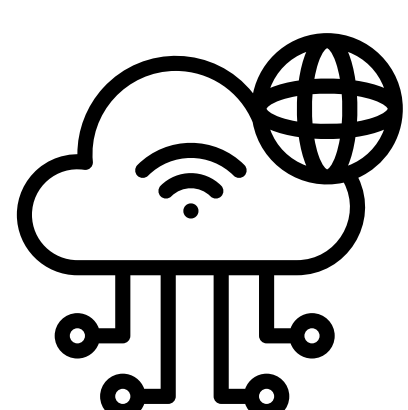

- Power Surge Protection
- ESD Protection

- GPS Location & Bearing
- GPS based Speed

- LED based indication
- Data Transfer & Device Status

- **SENSOTO** Cloud Connectivity
- OTA Upgrades/Updates

*Supports CAN (standard and extended) only. CAN FD shall be supported in upcoming versions

Robust by design. Powered by embedded apps and edge computation.

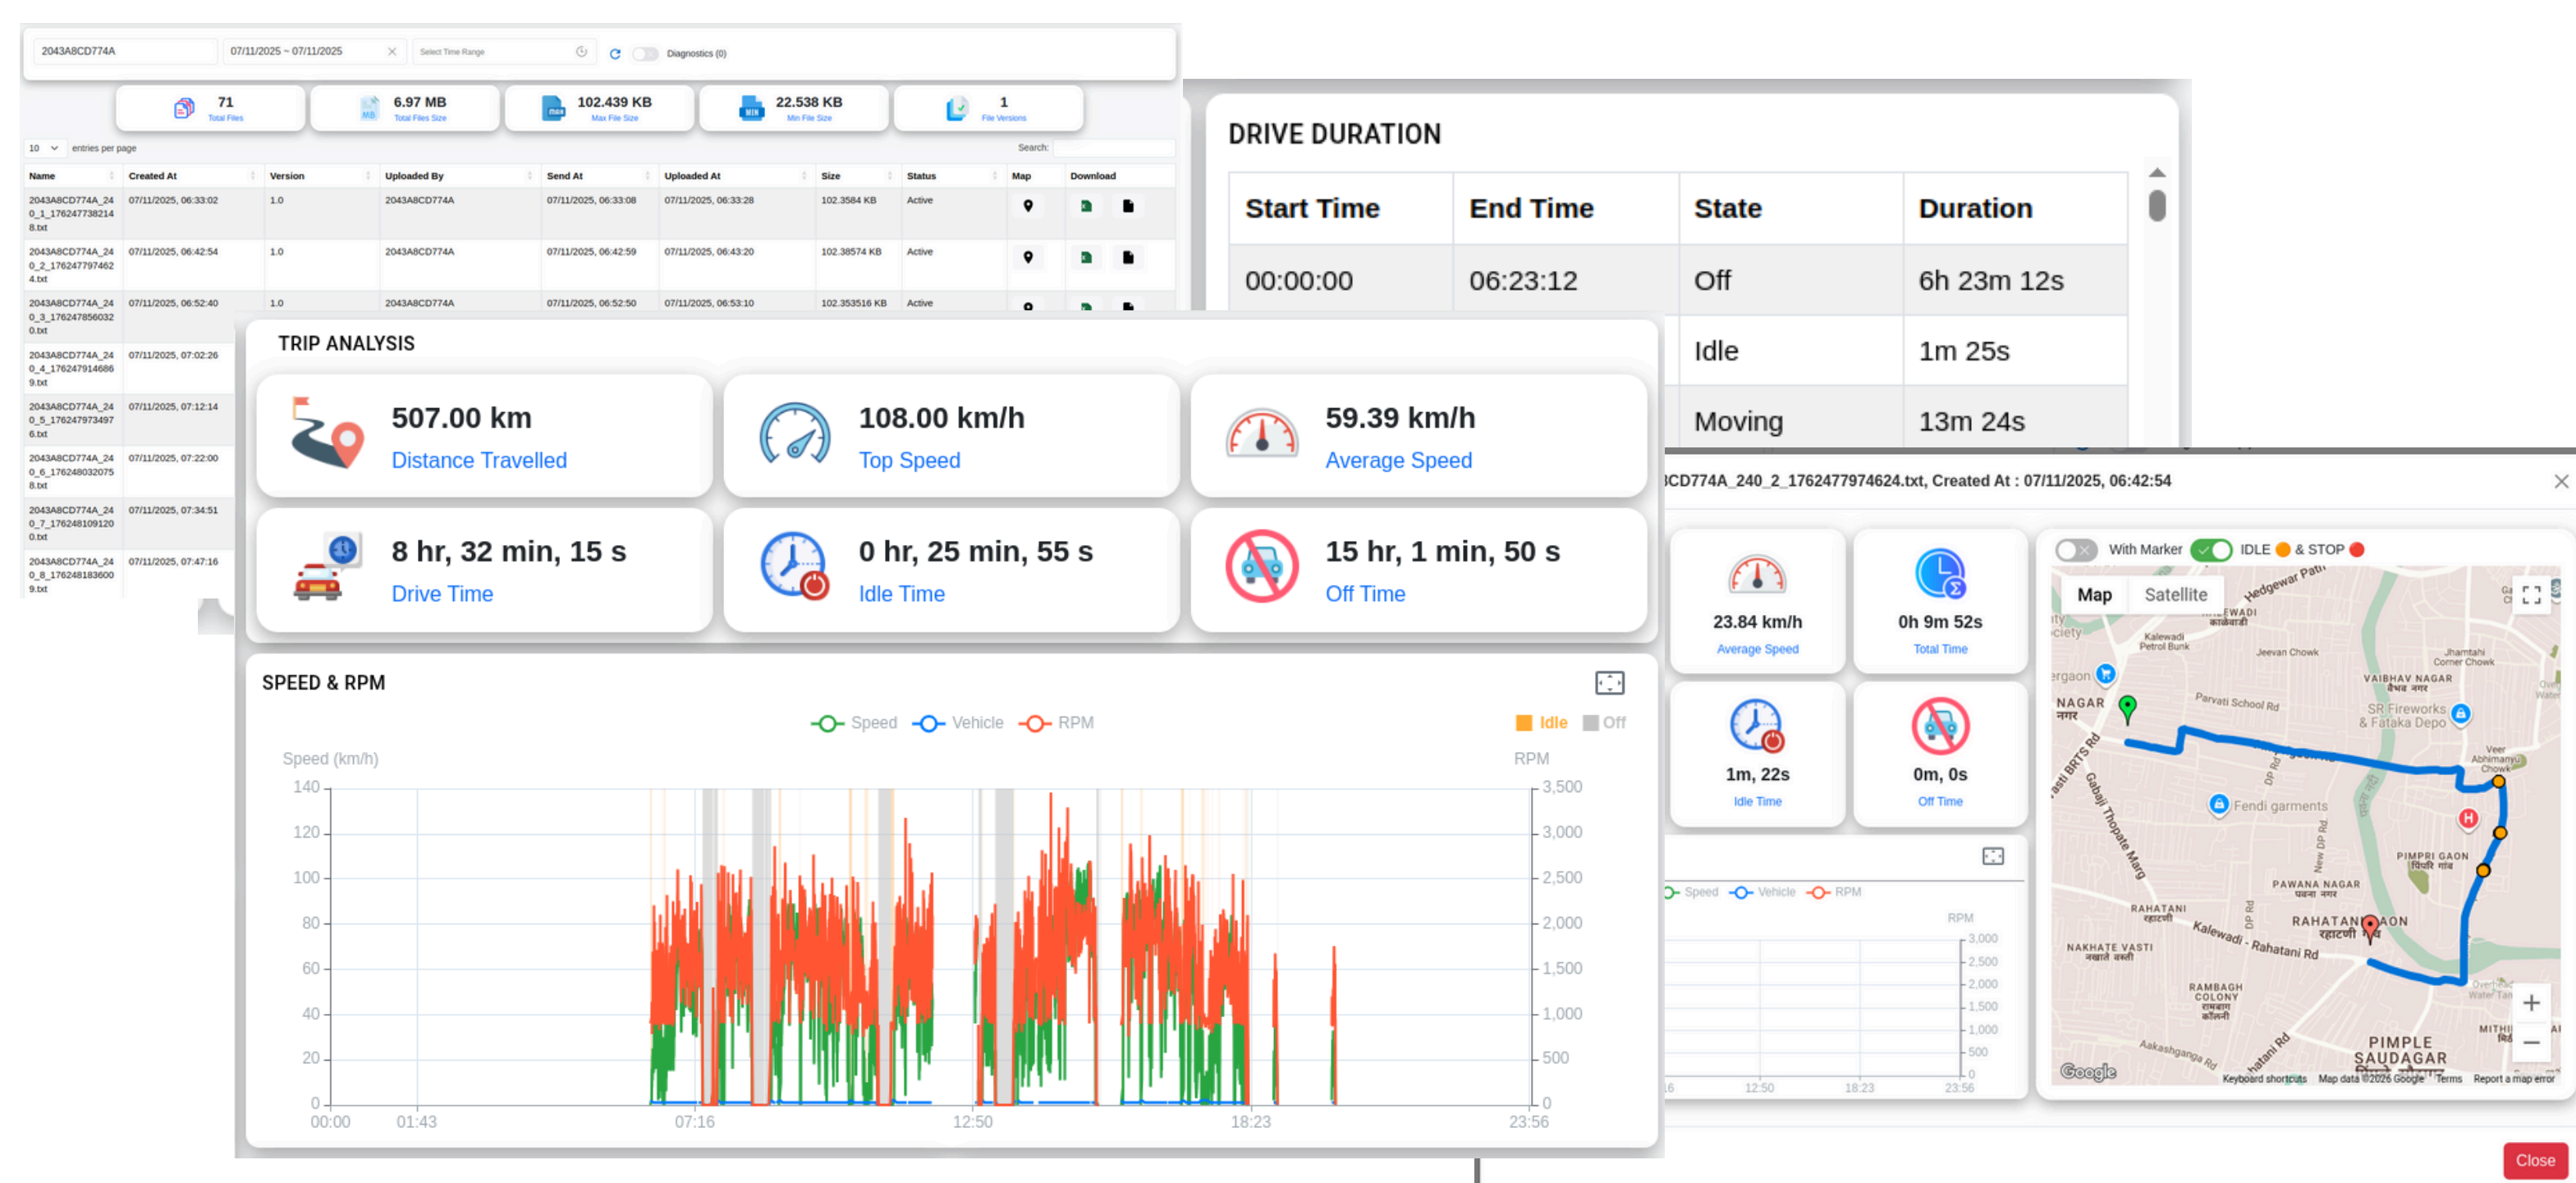

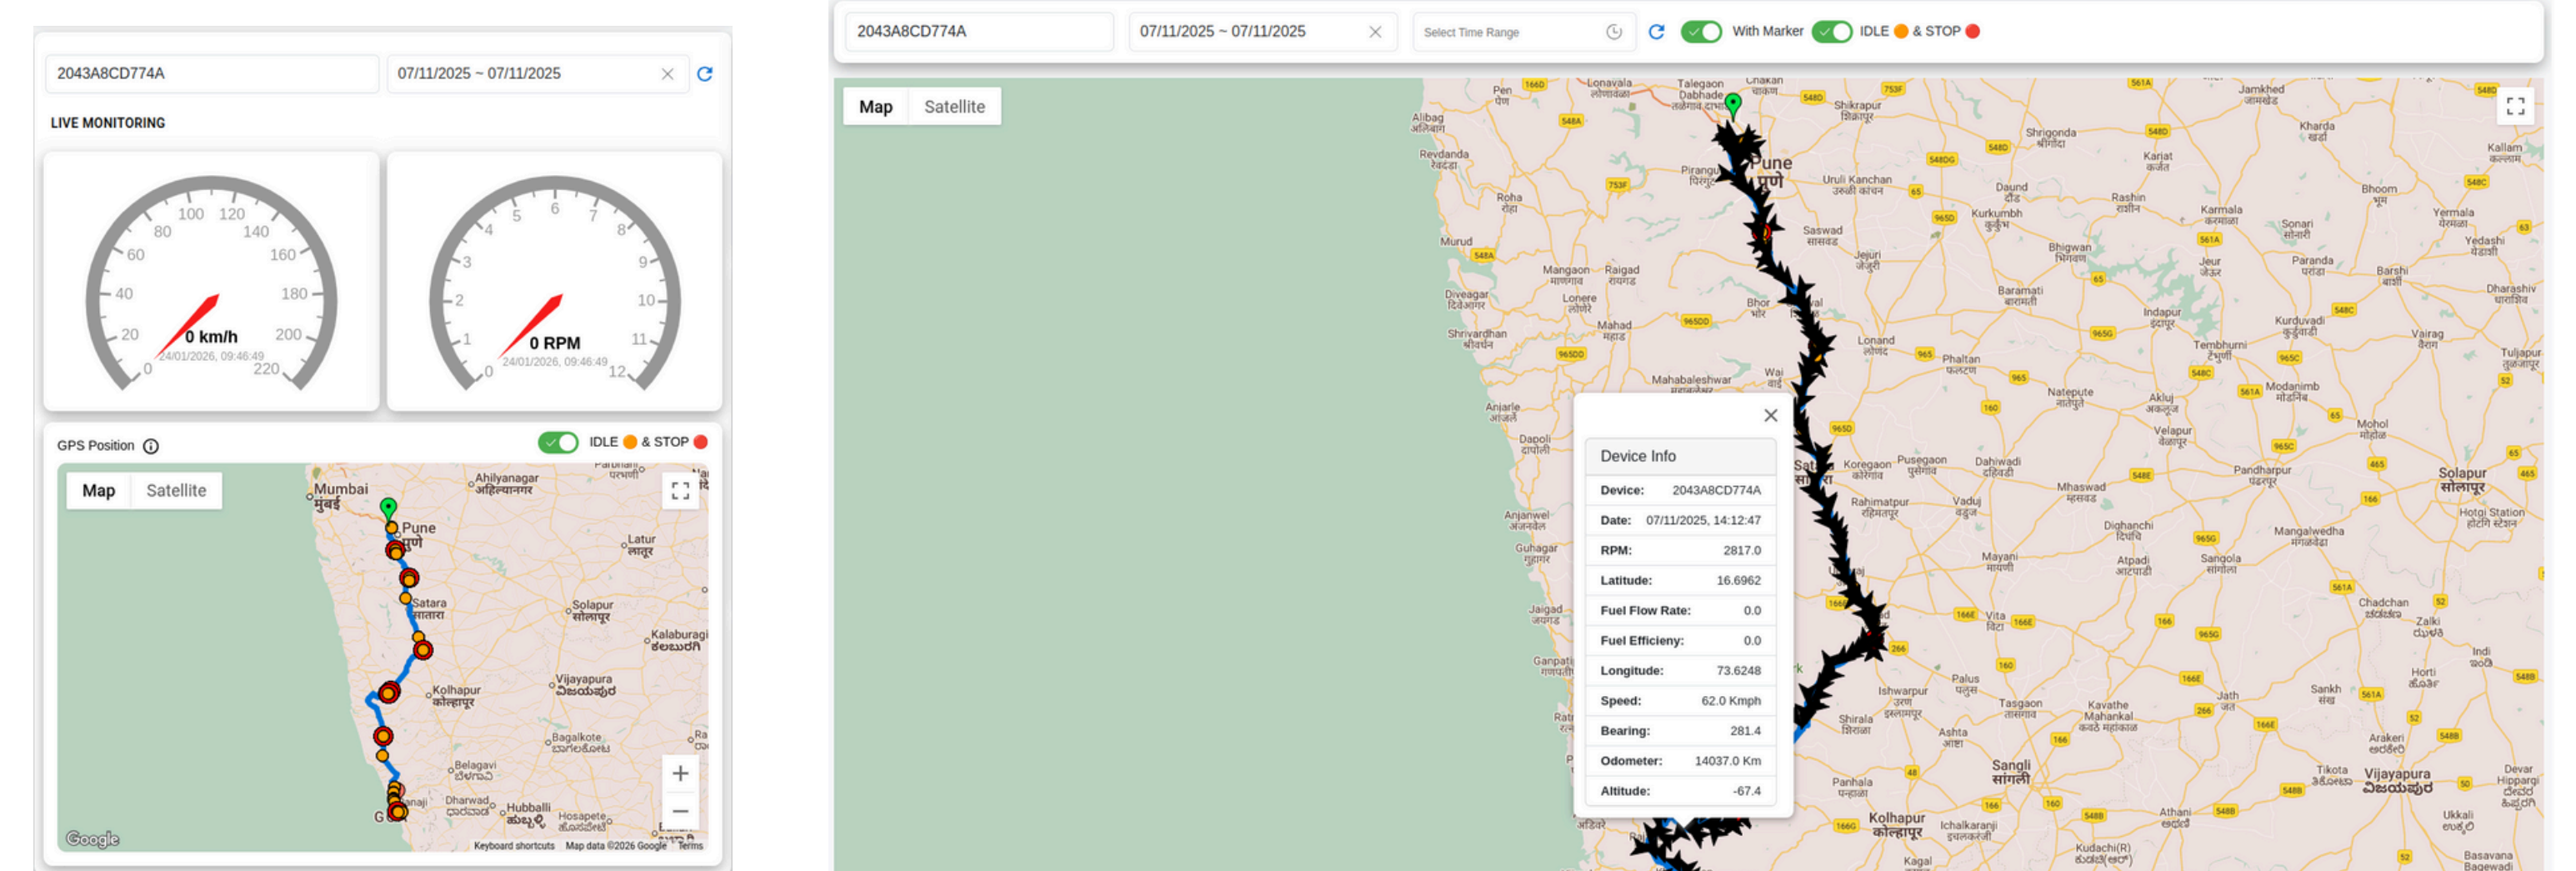

Vehicle Intelligence. Made Practical.

Real-time visibility, deep insights, diagnostics, and AI-driven driving analytics

Monitor Vehicle in Real-time

- Live visibility into vehicle status, location and activity
- Stay informed, real-time, as events happen

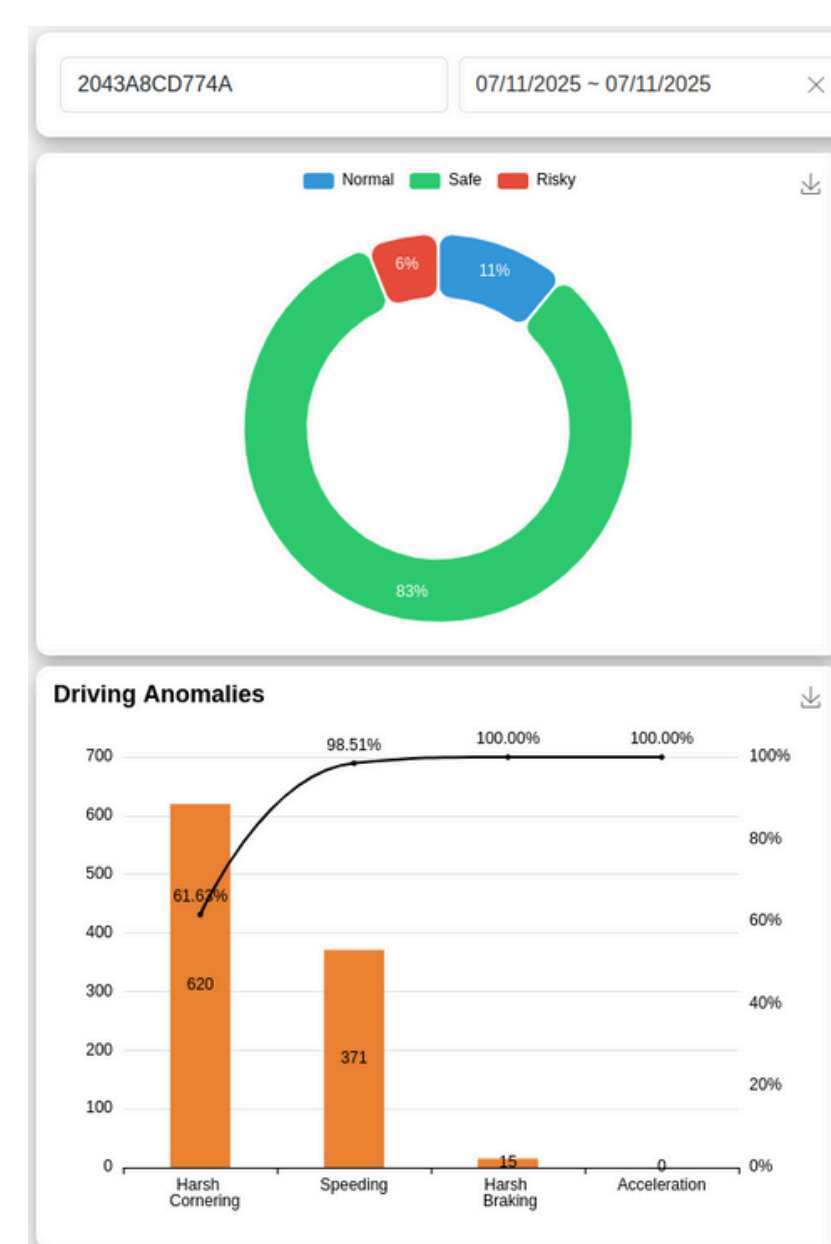

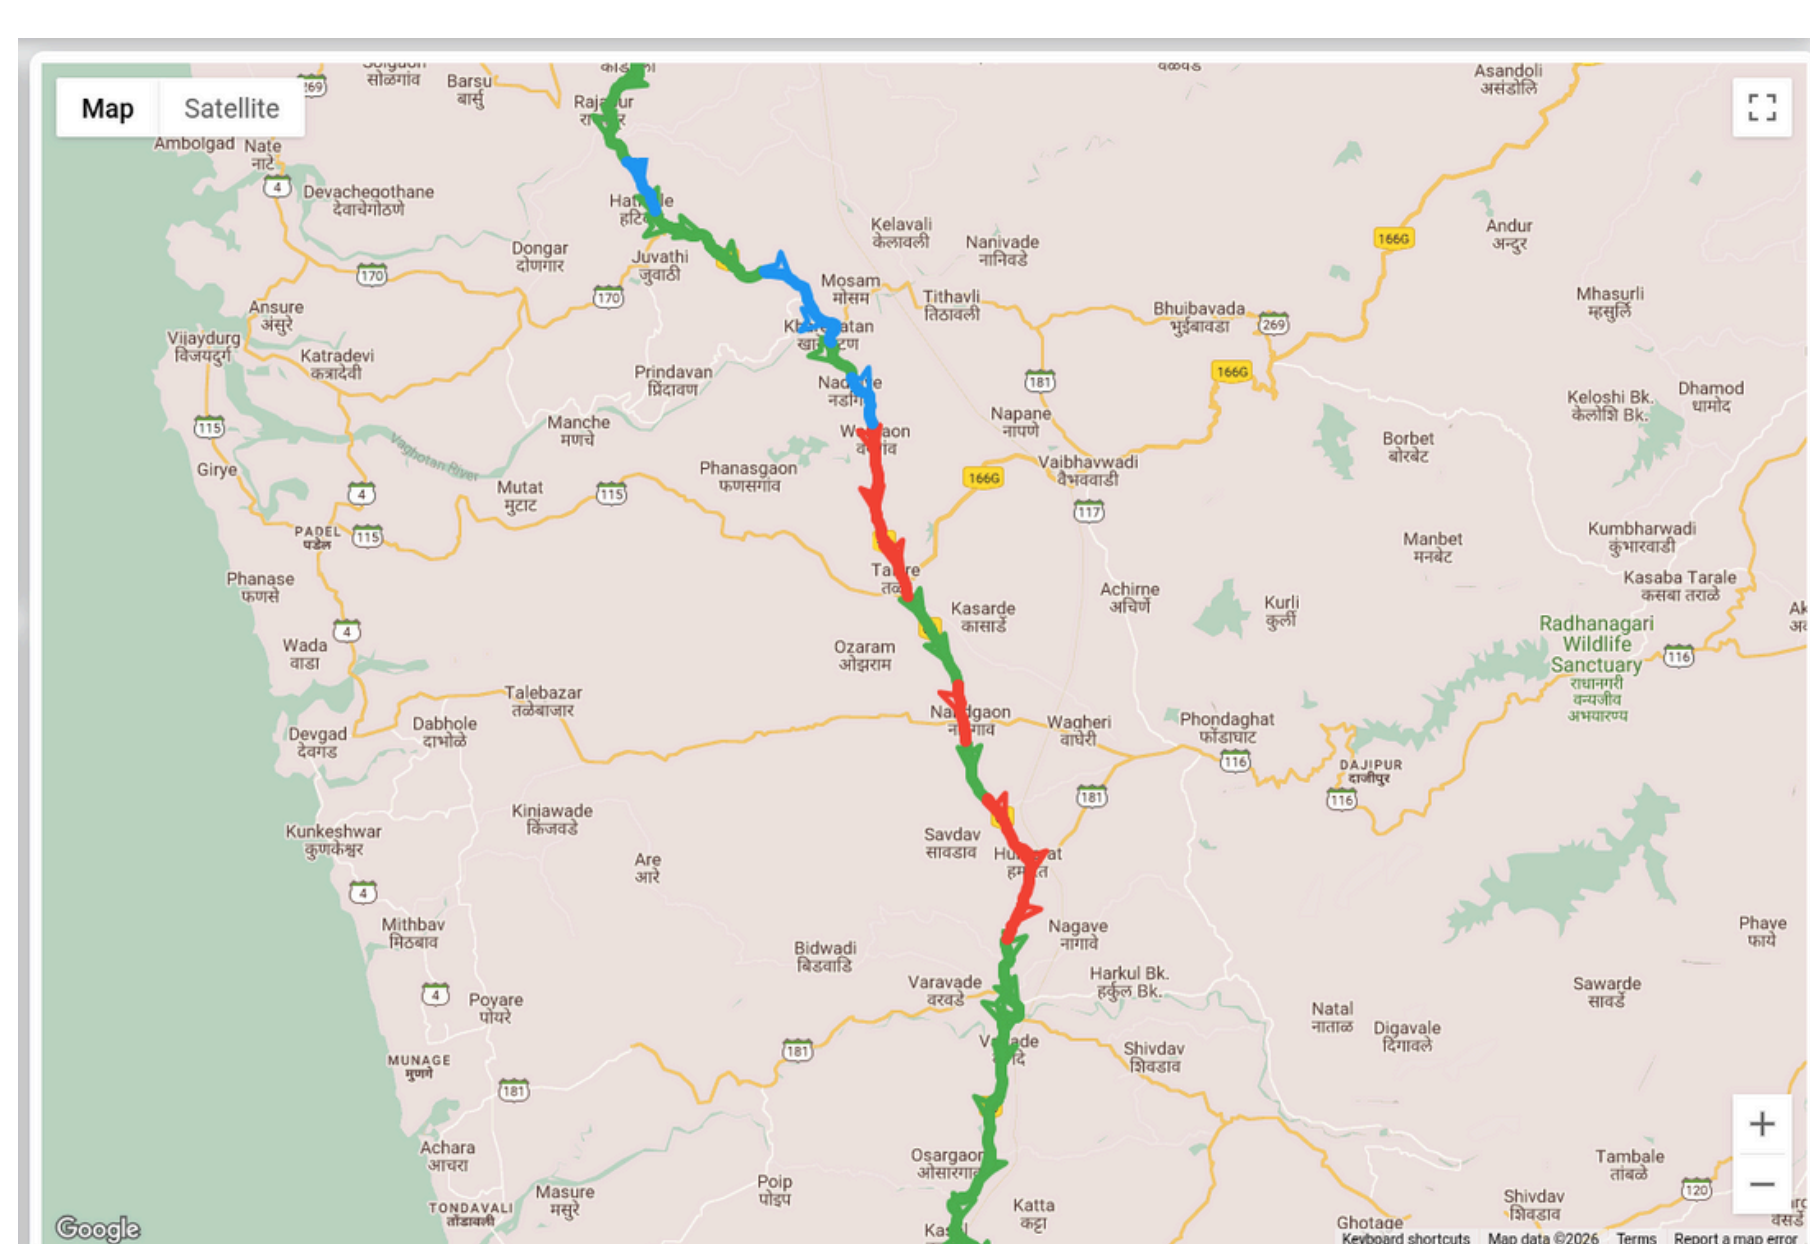

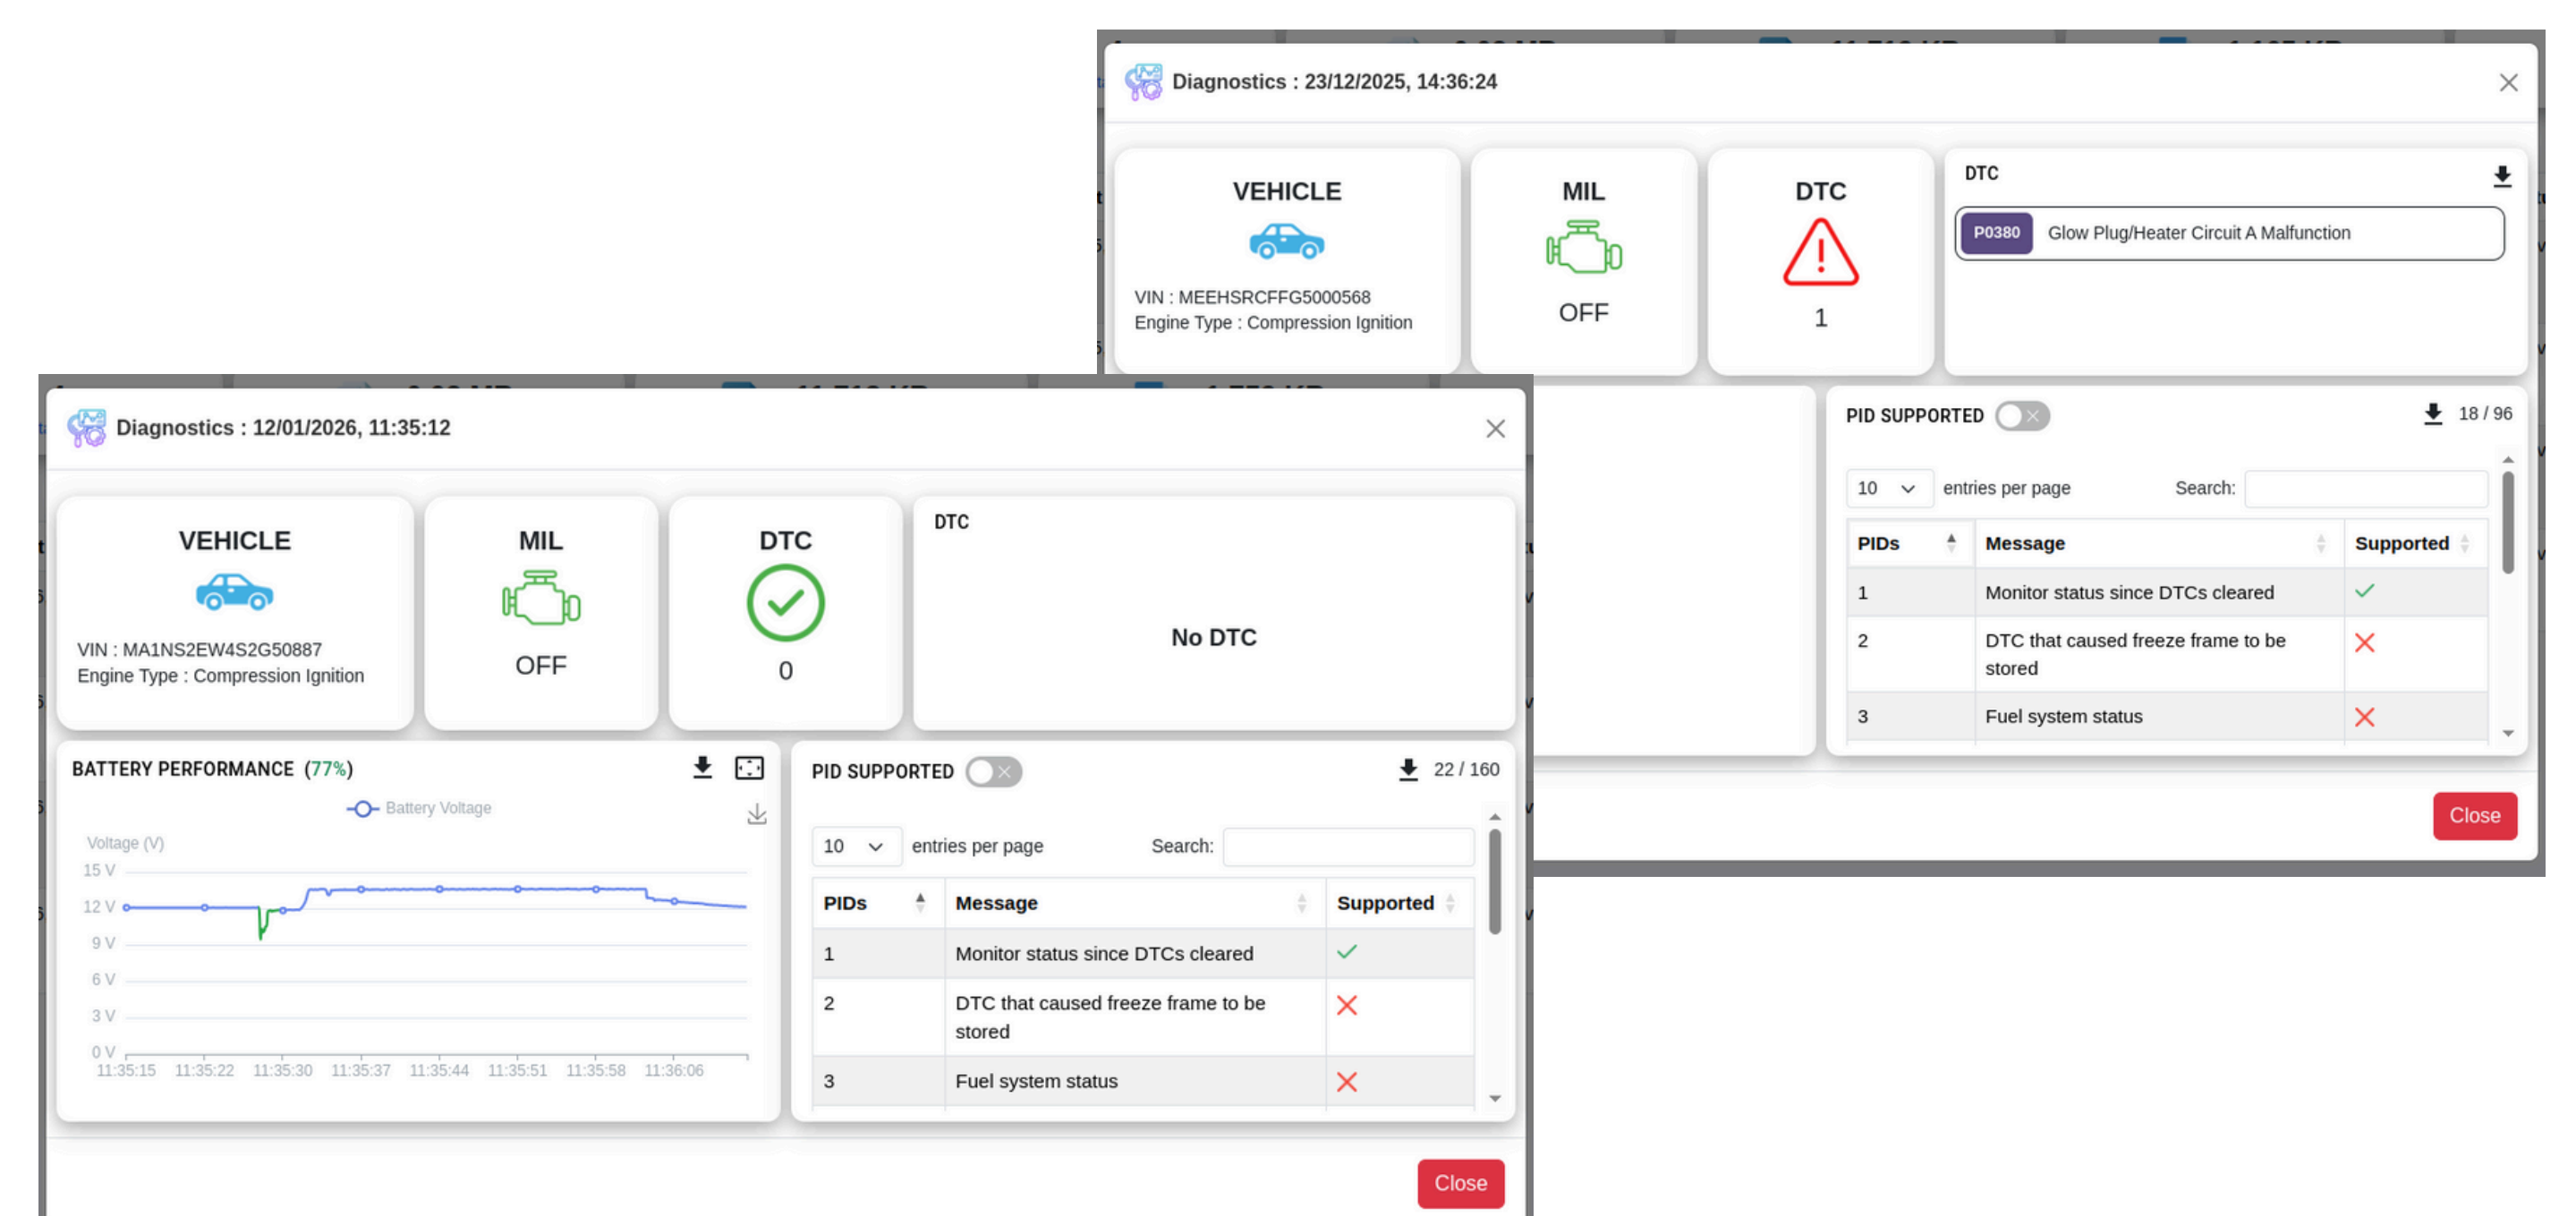

Trip Insights & Analysis

- Detailed trip summaries with actionable patterns
- Understand usage, routes and driving over time

Vehicle Diagnostics

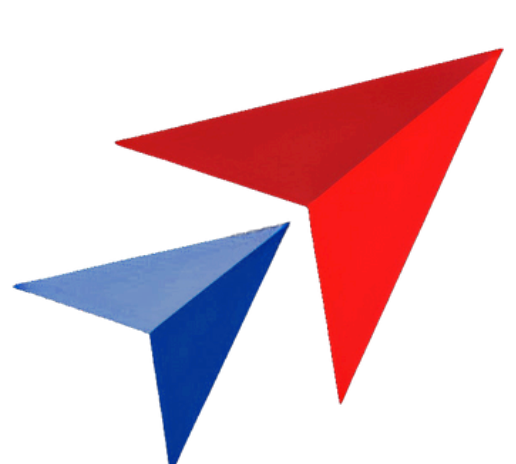

- Early detection of issues before failures occur
- Clear diagnostic insights for faster service decisions

Driver Styles - AI Analytics

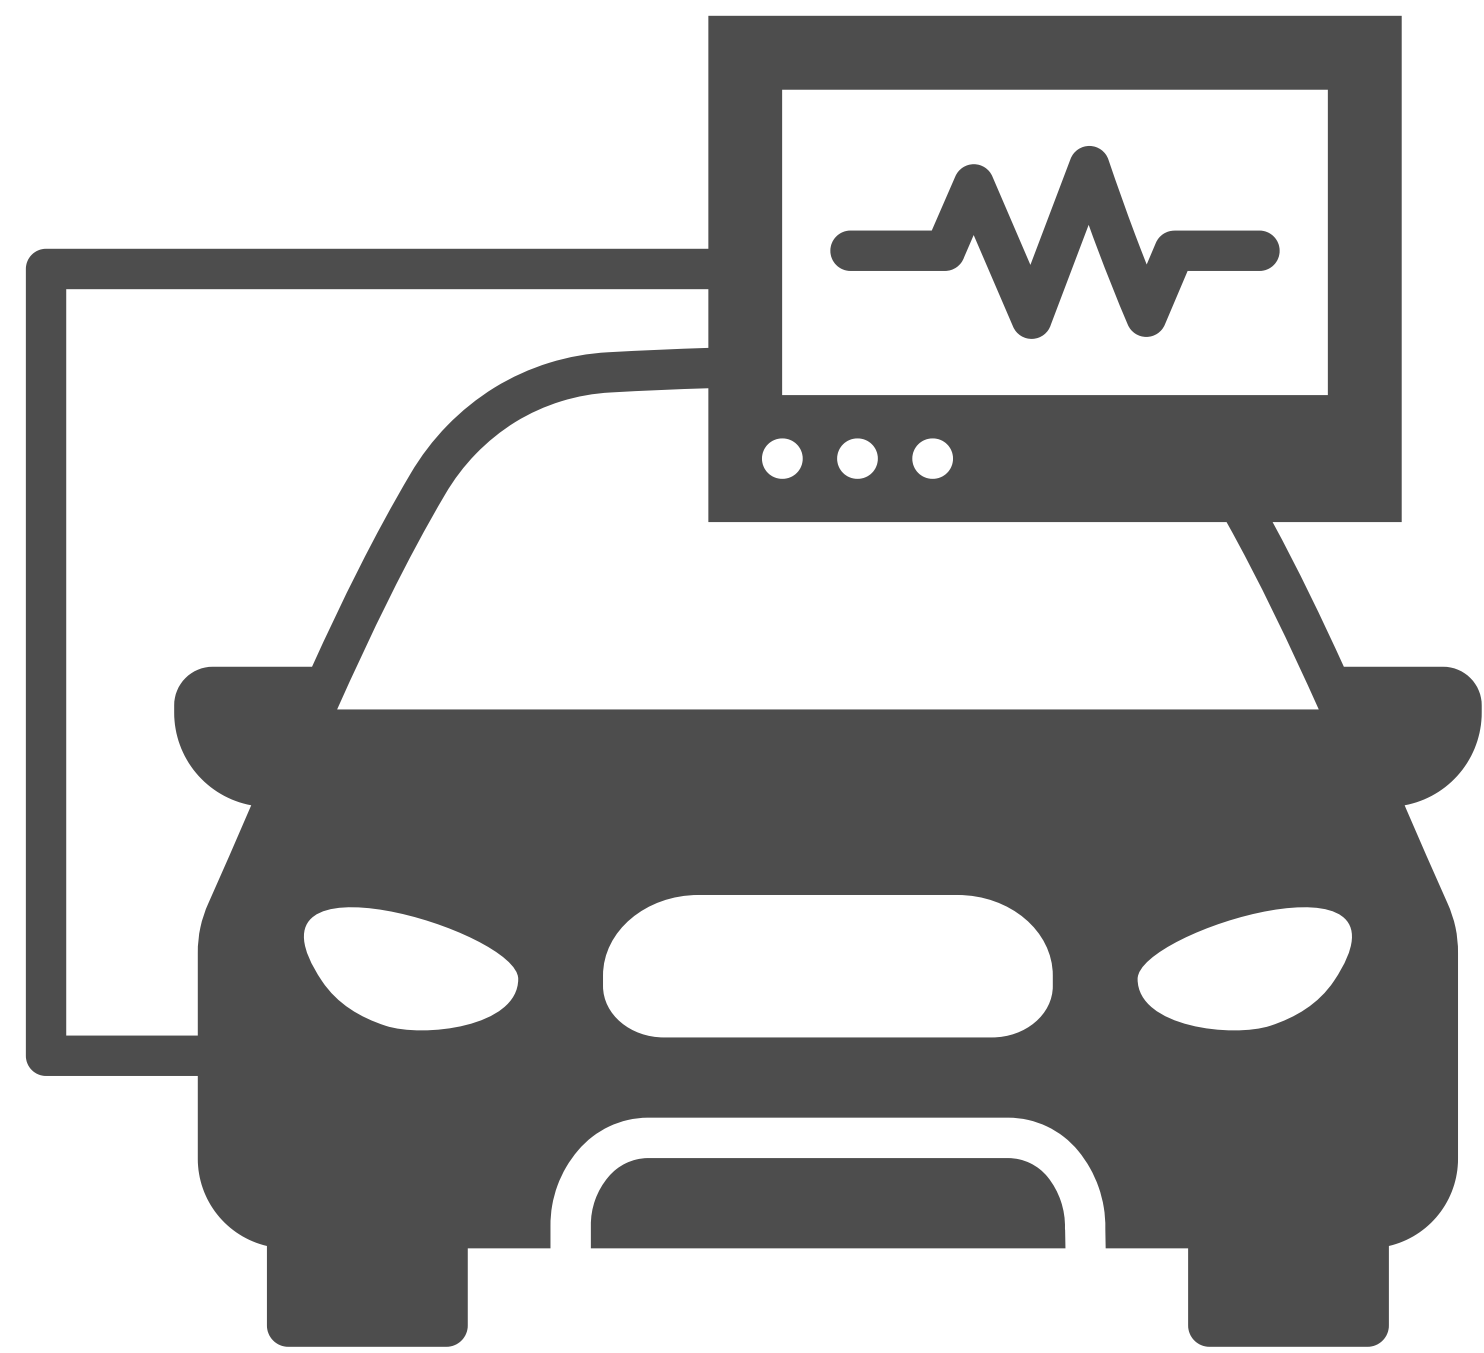

- AI-driven assessment of driving behaviour
- Actionable feedback for safer, more efficient driving

From real-time awareness to long-term insight,
SENSOTO shows the full picture.

Designed for the Vehicle's Entire Life Cycle

SR100 evolves from service tool to owner insight to OEM intelligence.

Vehicle OEM

- Real-world vehicle data across usage conditions
- Custom apps without hardware redesign
- Long-term intelligence across the vehicle lifecycle

Vehicle Owner

- Clear insights into driving & vehicle health
- Early warnings before problems escalate
- Safer, smarter, more informed driving

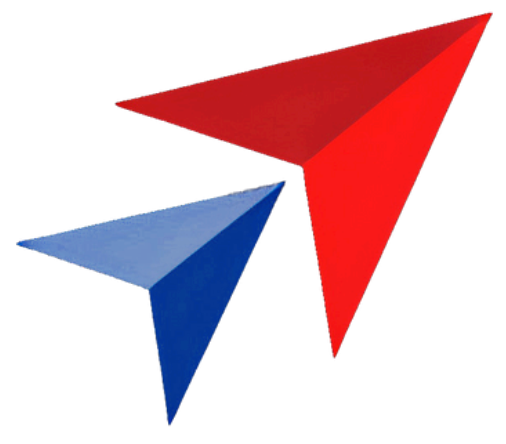

Vehicle Service

- Faster diagnostics with targeted data
- Embedded apps for specific service tasks
- Less guesswork. More first-time-right fixes

One SR100. Three Stakeholders. One Adaptive Platform.

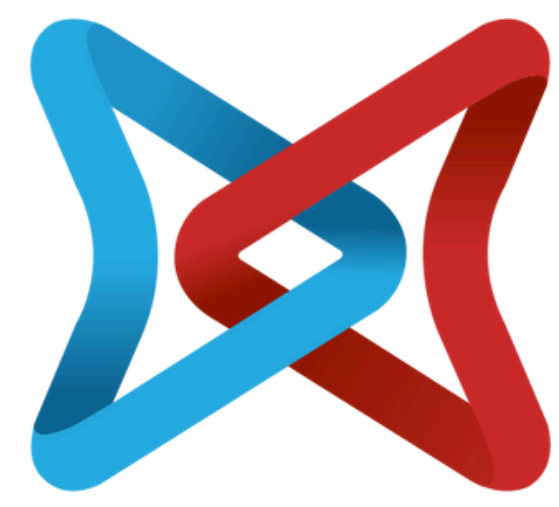

Leap&Scale® Group of Companies

OUR VISION

To enable industries to transform with purpose, through intelligent, scalable systems built to endure.

Our Leadership Compass

Create with care

Anticipate, don't react

Build what endures

Choose purpose over convenience

Strengthen the core, not the noise

Favour systems over heroics

Own the outcome, in success & in failure

Leave things better than you found them

Stay curious. Stay bold
